

Healthy Orange Water Friendly Sites

Worksites can take simple steps to become more “water friendly”. Adding water to vending areas and catered events, setting up “water clubs”, and providing water at meetings, are good and easy steps.

Orange County Department of Health can provide your worksite with signage to help promote the health benefit of drinking water. We will be happy to assist your worksite with additional tips.

If you would like to join as a “Water Friendly Site”, please contact Healthy Orange at 360-6680.
